### ABOUT ME

I am a Licensed Nutritionist, but I discovered my true calling in the world of technology. As a naturally resourceful person, I am motivated by the challenge of addressing and solving problems effectively and creatively. With my experience in the health field, I have learned valuable skills such as attention to detail, empathy, adaptability to change, and stress management, which I apply to every project I undertake. My ultimate goal is to collaborate with multidisciplinary teams to create innovative solutions that meet the client's needs and have a positive impact on the industry.

### EDUCATION

#### PLATAFORMA 5 | Coding Bootcamp

Jan 2023- Apr 2023

Degree: Full Stack Developer. More than 800 hours of technical education using React, Redux, Node.js, Express, PostgreSQL, MongoDB, Mongoose, Sequelize, WebSockets, JavaScript, HTML, CSS, and Sass participating in team projects using agile methodologies (Scrum) and source control code (GitHub).

#### CODERHOUSE | Frontend development

Mar 2022 - Sep 2022

HTML, CSS, Sass, Javascript y React.

#### UNIVERSIDAD DE BUENOS AIRES | Licenciatura en Nutrición

Ago 2017- Dec 2022

### SKILLS

#### PROGRAMMING LANGUAGES

HTML, Javascript.

#### FRONTEND

CSS, Sass, React, Redux, Material UI, Semantic UI, Bootsrap, Bulma, Tailwind.

#### BACKEND

Node.js, Express.js, MongoDB, PostgreSQL, Mongoose, Sequelize, SQL, Socket.io, JWT, Nodemailer, Firebase, ML5.

#### TESTING

Mocha, Jasmine.

#### OTHER TOOLS

Git, Github, Linux, npm, Scrum.

### PROJECTS

#### BROKEN OFFICE | Globant

Mar 2023 - Apr 2023 | 160 hours | 6 devs

This project consisted of a mobile-first Progressive Web Application (PWA) designed to report broken work equipment. My involvement focused on the backend, where we used MongoDB Atlas as the database. Additionally, we employed Node.js, Express.js, Mongoose, JWT for user authentication, and Postman for API documentation. On the frontend, we developed using React, Redux, and Material UI. It's worth noting that we included special features such as a chat implemented with Socket.io, an AI model for object recognition and categorization using ML5 and Google's Teachable Machine, and a geolocation function that utilized the Javascript Geolocation API, Google Geocoding service, and Mongoose's geospatial queries.

#### DEVGAMES3 | Ecommerce

Mar 2023 | 80 hours | 6 devs

It was a project in which we developed an e-commerce platform for video game sales. I was part of the frontend team and we used React.js, Redux, Sass, and Material UI for its construction. For the backend, we used Node.js, Express.js, PostgreSQL, and Sequelize, and documented the API with Postman.

#### TMDB | Website

Mar 2023 | 50 hours | solo

I created a website that allowed displaying, filtering, and adding TV shows and movies to favorites by consuming The Movie Database (TMDB) API. For the backend, I used Node.js, Express.js, PostgreSQL, and Sequelize, while on the frontend, I used React.js, Redux, Sass, and Material UI.

#### THE WAVE SEARCHERS | Ecommerce

Ago 2022 - Oct 2022 | 40 hours | solo

As part of this project, I designed and programmed a surfboard e-commerce website. The frontend was built with React and CSS, and the database was hosted on Firebase.

#### DE LA CRUZ | Ecommerce

Jun 2022 - Jul 2022 | 40 hours | solo

In this project, I created an e-commerce website for the sale of e-books. I used HTML, Sass, and JavaScript for its development.

#### GIRLS WHO CODE | Website

Mar 2022 - May 2022 | 40 hours | solo

It consisted of a static website that I developed for a fictitious NGO as part of my Frontend Development program at CODERHOUSE. I used HTML, Sass, and Bootstrap to build it.

### EXPERIENCIA LABORAL

#### FREELANCE | Nutritionist

Dic 2022 - Actualidad

I carry out the planning, prescription, and follow-up of nutritional plans.

#### MARCELO GONZALEZ RODAMIENTOS S.A. | Salesperson and Community Manager

Nov 2020- Mar 2021 / Nov 2021- Dic 2022

I provided customized solutions tailored to different needs from clients and was responsible for managing the brand's social media, working in collaboration with a graphic designer to define and create its aesthetic and feed.

#### NEMIHUÉN S.A. | Secretary

Dic 2015 - Mar 2016 / Dic 2016 - Mar 2017 / Dic 2018 - Feb 2019

I carried out truck weighing at the plant entrance, analyzed the quality of the cereal, and inputted relevant sample data into the system.
